The Applicants' Team Contract

Team members:

- Forrest Brown | Computer Science | brownft@mail.uc.edu

- Evan DiFilippo | Computer Science | difiliet@mail.uc.edu

- JP Burger | Computer Science | burgerjs@mail.uc.edu

Team meetings:

Team meetings should occur at least once a week on Tuesdays at 6:00 p.m., with the exception of unforeseen events or notifying the team prior to the meeting. If a team member is going to miss a meeting they should notify the team as soon as possible. In the event that the team needs to meet more than once a week it will be discussed and decided on a week by week basis.

Project focus:

The project will be a workout application created with Flutter with the focus on predicting muscle overload optimization via artificial intelligence. With the additional focus of ease of data entry and data visualization. The way that we are different from other applications on the market is our application will have a focus on making workout analytics easy for all levels of expertise to understand along with ensuring that optimal muscle growth is achieved.

Role of each team member:

Note that these roles are just primary focuses of each individual, not the exclusive roles of each member. The roles for each team member are as follows:

- Forrest Brown

  - Data science focus

- Evan DiFilippo

- ○ Backend development focus

- JP Burger

  - ○ Frontend development focus
